WHY TRADITIONAL SHELF COMMUNICATION FALLS SHORT

In today's fast-moving retail environment, static paper signage can't deliver the impact, flexibility or control that modern retailers and brands need.

TRADITIONAL PAPER SIGNAGE

LCD SHELF DISPLAYS

Static Promotions	Labour-Intensive Updates	Inconsistent Execution	Poor Campaign Visibility	Missed Opportunities	Dynamic Video Content	Remote & Real-Time Updates	Consistent Execution	High Campaign Visibility	Unlock Retail Media Value
Messages are static and cannot adapt to changing promotions, pricing or seasonal campaigns.	Manual printing, replacement and store-wide installation consume valuable staff time and operational resources.	Paper signage can become outdated, damaged or incorrectly placed, leading to pricing inconsistencies and poor customer experience.	Limited visual impact reduces shopper engagement and makes promotional campaigns less effective.	Slow implementation prevents retailers from reacting quickly to market trends, supplier campaigns and time-sensitive promotions.	Display high-definition video, animations and rich digital content that captures shopper attention at the point of purchase.	Instantly update promotions, pricing and campaigns across one store or an entire retail network from a central platform.	Ensure every store displays the correct content at the right time with centralised scheduling and campaign control.	Motion, colour and dynamic messaging significantly increase promotional impact and shopper engagement.	Create new revenue opportunities by delivering supplier-funded campaigns and measurable in-store advertising.
